FAIR LAWN NO IDLING CAMPAIGN FACTS

"Children breathe in a lot more air for their body size as compared to adults, so they can get a much larger dose of air pollution into their lungs. They are also still growing and developing so their lungs and bodies are more susceptible."

~ Sara Adar, ScD, MHS, Assistant Professor of Epidemiology at U Michigan School of Public Health

QUICK FACTS

- Each of us takes 20,000 breaths (3400 gallons of air) each day ~ *American Lung Assoc.*
- Exposure to vehicle exhaust increases the risk of death from heart and lung disease and lung cancer ~ *American Cancer Society*
- Asthma is the most common chronic illness in children and the cause of most school absences ~ *American Lung Assoc.*
- One hour of idling burns up to a gallon of fuel ~ *IN.gov*
- Frequent restarting has little impact on engine components like battery and starter motor ~ *Natural Resources Canada*
- Diesel exhaust contains both very small particles and 40 chemicals that are classified as "hazardous air pollutants" under the Clean Air Act ~ *EHHI*
- Idling a car for five minutes per day can emit as many as 25 pounds of harmful air pollutants and 260 pounds of carbon dioxide per year ~ *Motor-Smart.org*
- Modern engines need no more than 30 seconds of idling before starting to drive even on very cold days. In fact, long periods of idling may harm your engine
- *Natural Resources Canada & Motor-Smart.org*

THIS CAMPAIGN IS A JOINT INITIATIVE OF
